INTRODUCING ALLHERE

What is AllHere?

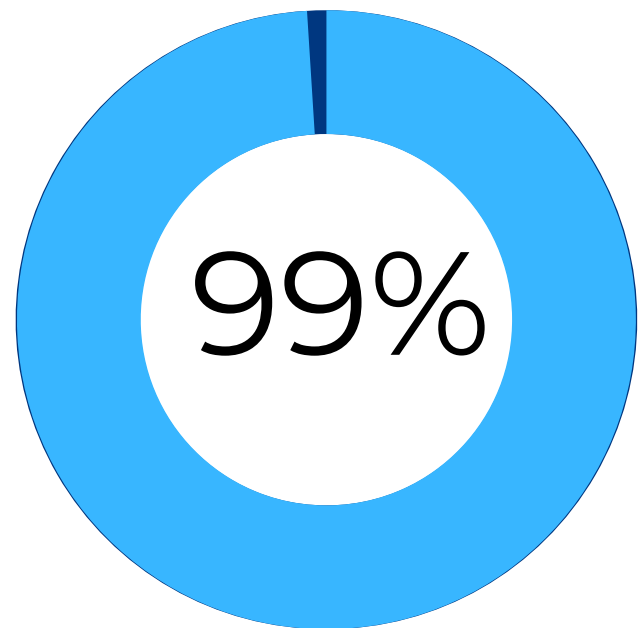

- An attendance intervention platform that uses a friendly chatbot powered by artificial intelligence to communicate with families.
- The customizable and easy-to-use system provides proactive messages and on-demand resources to guide students and families through school, removing some of the obstacles that keep them from engaging.
- AllHere offers robust reporting and analytics with actionable insights to ensure the right resources go to the students and families who need them most.

How does AllHere work?

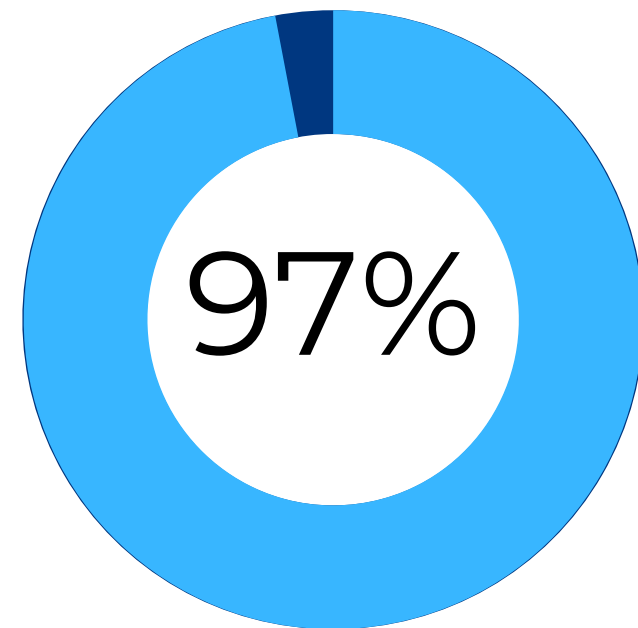

- The interactive system operates entirely over SMS text messaging without the need for a smartphone or app.
- The platform utilizes data from the student information system to identify and manage the root causes of student absenteeism.
- The chatbot responds in less than 2 seconds to inquiries and provides resources to a nearly limitless number of families and students.
- When the system identifies a “priority” topic or doesn’t have the answer, questions are sent to an AllHere team member. The responses become part of the automated knowledge base.

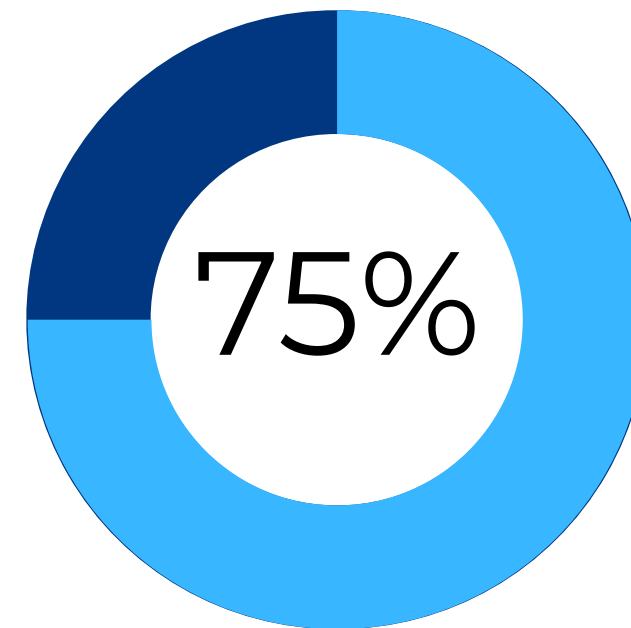

How effective is SMS texting?

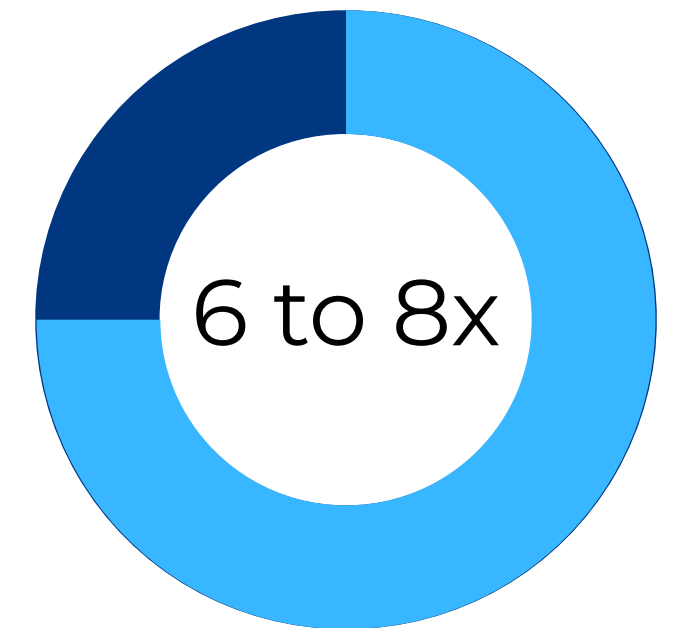

Open Rate

Messages opened within 15 minutes of receipt

Prefer SMS Communications

Higher engagement than email

Benefits to Families

- Fast, easy way to receive answers to their frequently asked questions about transportation, schedules, school calendars, in-the-moment resources, and more.
- Automated customer service that is available to them 24/7.
- For families whose first language is not English, the chatbot can send and receive translated messages in 100+ languages.
- Families receive text messages with personalized updates and tips to boost their child's engagement, attendance, well-being, and learning.

Benefits to Employees

- Provides unprecedented support in real-time, streamlining processes like attendance, student and family engagement, and interventions.
- Lessens the already taxing workload of school site and district personnel.
- Teachers, school leaders, data analysts, counselors, and other support staff can help students who need more hands-on and personalized support.
- Educators can stay one step ahead, with more time to focus on complex challenges that require hands-on instruction.
- Complements teachers' existing communication tools.

Benefits to Schools

In addition to increasing attendance, reducing dropout rates, building parental engagement, and improving customer service, AllHere powered by AI can:

- Administer surveys about topics ranging from technology connectivity to social and emotional learning. Results can be used to connect students and families to educational support services and increase the district's preparedness.
- Assist with enrollment by communicating with families with timely, targeted guidance about processes, deadlines, and criteria.

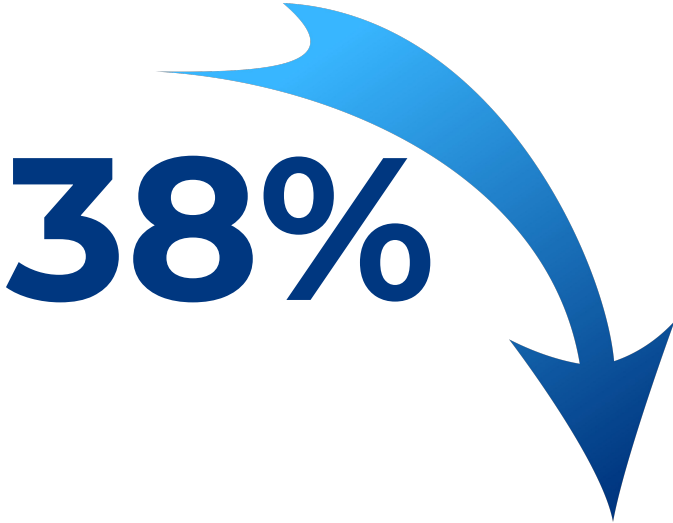

Proven Results

Weekly, automated alerts to families about missed assignments, grades, and absences positively impacted student attendance and outcomes.

Research on engaging parents through technology showed improved academic outcomes.

Increase in class attendance

Decrease in course failure

Increase in GPA (points)
